Raising multiple on post-trough outlook, but the pace of recovery has risks

Reiterate Rating: UNDERPERFORM | PO: 58.00 USD | Price: 66.75 USD

Destocking ending, but competitive pressures remain

FMC maintained its 2024 revenue guidance despite Q1 sales coming in below the lowend of its \$925-1,075 mn outlook (\$918 mn). With the Q2 guidance in line with Street/our estimates, the weight of reaching the full-year sales outlook of \$4.5-4.7 bn falls even more on 2H24. While mgmt had favorable comments on underlying demand, we remain more cautious on the 2H recovery. Note that the volume contraction in Q1 essentially erased the cumulative volume growth from the prior 5 years (Exh 1), and the same applies to 2Q based on the midpoint of the implied volume guide. But to hit the required 23% y/y growth in 2H, FMC's volumes would have to return to 2021 levels, which is plausible, but we see risks from competitive pricing, weakening farmer economics, heavy exposure to LatAm ($\sim 44\%$ of sales), and increased generics, as noted by FMC's peers.

Staying Underperform w/ 2024E revs below guidance

Given Q1 challenges and 2H concerns, we lowered our 2024 revenue estimate to \$4,459mn from \$4,508mn, below the low-end of the \$4.5-4.7bn guidance. We have raised our volume expectations for 2H by 200bps to 16-17% in light of FMC's positive commentary but we are still far short of FMC's forecast. We raised our 2024E EBITDA estimate by \$9mn to \$1,026mn, driven by cost actions achieved in Q1. Our 2025-26 EBITDA estimates are little changed at \$1,181mn and \$1,332mn, respectively (note that FMC's 2026 EBITDA target is \$1.3-1.5bn). Given signs of demand troughing, we are raising our 2024E EBITDA multiple to 10.5x from 10x, thus lifting our FMC PO to \$58 from \$54. However, valuation and our revenue recovery concerns keep us Underperform.

New products are a compelling growth driver

New product introductions (NPI) within the last 5 years are on track to represent 17% of FMC's sales in 2024, up from 10% in 2021, and with a larger penetration (~25%) in North America. FMC's R&D platform has steadily expanded, particularly into biologicals, and represents a significant longer term growth driver. FMC's pheromone technology (not toxic but block insect mating) will be launched in late-2025. Not only are new modes of action necessary to counter pest resistance development, but Agchem companies have deemphasized crop chemical research in the last couple decades. FMC will participate in BofA's virtual AgTech conference on June 6.

Company Sector

Chemicals-Major

Company Description

FMC is a leading producer of crop protection chemicals that generated \$4.5bn in sales in 2023. The company is a leading supplier of insecticides, herbicides and fungicides.

Investment Rationale

After significant 2023 sales pressure from channel destocking, 2024 looks quite challenging as well . We also see potential for price pressure in 2024, driven by increased competitive behavior. The shares have been under pressure from risks of generic competition, as the diamide insecticide platform is reaching patent expiries.

Price objective basis & risk

FMC Corporation (FMC)

Our \$58 PO is derived applying a 10.5x multiple on our 2024E EBITDA estimate. We opt for a multiple of 10.5x, on the low end of the historical 5-year range of 9-14x, given increased risks to both the crop chemical market and FMC's own diamides franchise.

Upside risks are higher application rates and pricing for crop protection chemicals as supported by macro and weather-related issues, a weaker dollar, a rally in grain prices.

Downside risks are a shift to generic crop chemicals and competitive pricing.

RI Issuers that were investment banking dients of BofA Securities or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. VOLATILITY RISK RATINGS, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. INVESTMENT RATINGS reflect the analyst's assessment of both a stock's absolute total return potential as well as its attractiveness for investment relative to other stocks within its Coverage Cluster (defined below). Our investment ratings are: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. An investment rating of 6 (No Rating) indicates that a stock is no longer trading on the basis of fundamentals. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

INCOME RATINGS, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend. Coverage Cluster is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

This report may contain a short-term trading idea or recommendation, which highlights a specific near-term catalyst or event impacting the issuer or the market that is anticipated to have a short-term price impact on the equity securities of the issuer. Short-term trading ideas and recommendations are different from and do not affect a stock's fundamental equity rating, which reflects both a longer term total return expectation and attractiveness for investment relative to other stocks within its Coverage Cluster. Short-term trading ideas and recommendations may be more or less positive than a stock's fundamental equity rating.

BofA Securities is aware that the implementation of the ideas expressed in this report may depend upon an investor's ability to "short" securities or other financial instruments and that such action may be limited by regulations prohibiting or restricting "shortselling" in many jurisdictions. Investors are urged to seek advice regarding the applicability of such regulations prior to executing any short idea contained in this report.

Foreign currency rates of exchange may adversely affect the value, price or income of any security or financial instrument mentioned herein. Investors in such securities and instruments, including ADRs, effectively assume currency risk.

BofAS or one of its affiliates is a regular issuer of traded financial instruments linked to securities that may have been recommended in this report.
